

## **Reabel Partners Facilitates MoU Between SYNDICO SAS and BATONICS AB to Advance Real Estate Technology Solutions**

Paris, France – April 9th, 2024 – SYNDICO SAS, a provider of Software as a Service (SaaS), mobile, and digital solutions for the real estate sector, has signed a Memorandum of Understanding (MoU) with BATONICS AB, a technology developer specialising in modelling engines within the field of asset management including real estate investment. This collaboration, facilitated by Reabel Partners, aims to enhance SYNDICO's product offerings through the integration of advanced analytics, improving decision-making and operational efficiency that Batonics offers..

Under the terms of the MoU, the project will have an exploratory nature in a range of advanced analytics methodologies, including unsupervised clustering, semi-supervised label generalization, and Monte Carlo simulation-like scenario modeling with sensitivity analysis. These technologies aim to provide SYNDICO with the tools to better assess and prioritize the impact of various factors on strategic goals.

The MoU also outlines the exploration of several potential use cases aimed at transforming operational processes within the real estate sector including predictive traffic management, resource optimization, and automated utility billing, alongside artificial intelligence for workforce scheduling and intelligent request management.

Key focuses include employing operational research for better resource allocation, natural language processing to streamline communications, and predictive analytics for strategic planning and energy consumption analysis. This integration of technology seeks not only to refine the management of physical spaces and resources but also to anticipate and meet the evolving needs of the sector, promising a significant leap towards sustainable, efficient property management through digital innovation.
